WORLD CANCER DAY is observed on the 4th of February to give awareness on Cancer, in order to reduce illness and death rate across the world. Let's fight together against the global cancer epidemic, which was observed since 2000. 'Close the Care Gap' is the theme of World Cancer Day. 2022_-24. Let's work together to create awareness on this.

FACING YOUR FEAR

All living being has emotions and one among them is fear. There are many types of fear. Height, spider, snake, darkness, public speaking etc.

Studies and researches says fear factor can differ from gender to gender. Men have more materialistic fear and women have psychologically fear. Men learn to face quicker but women takes time, they become stronger than men. This is because the accomplishment of their emotional fear makes them more confident in themselves

Fear and always be conquered with time just have to believe in ourselves.

Editorial

Role of Technology in Present Education

Today, direct access to the internet has made education easy. It has upgraded the level; Students can quickly learn or read whatever they need on an online platform or with the help of different educational apps.

Nowadays, techs like computers and laptops or mobile phones are readily available and easy to use, helping you educate yourself.

The use of technology in education is beneficial for those who don't have much time. Suppose a person wants to work and learn a new skill to improve or upgrade his/her work so that he/she can easily opt an online course.

During the COVID-19 pandemic, the schools were closed for more than five months, and the only possible way of education was through online mode.

Technology rescued students from being uneducated for a year, during COVID crisis.
