

'EARN & LEARN FOR THE DESERVING' PROGRAM

'EARN & LEARN FOR THE DESERVING' program provides opportunities to the students of National Child Development Council to earn while they are learning through part-time jobs. Vocational education is a great combination of work and learning. Through our innovative program, the students of various streams not only financially support their studies, but also gain practical experience which would stand by them in their later career. This helps the students to gain first-hand experience of the corporate world and thereby develop their self-confidence and personality. Accordingly, the deserving students are encouraged by us to take up vocational training or part-time jobs after completing their regular classes or during holidays which would enhance their rating at the time of final placements. Students must weigh their qualification skill and knowledge more wisely because skills and capabilities are also important with ranks or grades. Benjamin Franklin quotes, "tell me and I forget, teach me and I remember, involve me and I learn" this defines vocational training.

IS WORK AND LEARN A GOOD OPTION?

Yes, Definitely!

- It provides opportunities for students to earn while learning to meet their fee expenses
- Exposes the students to the world of work before actual employment
- Gives students hands-on experience and confidence thereby prepares them better for taking up jobs in future
- This program turns out to be a major draw for several students who might have otherwise dropped out due to financial reasons

NEED FOR EARNING WHILE LEARNING:

- Earning while learning is more than a necessity for students coming from poor financial conditions
- Working learners are more concerned about enhancing their resumes and gaining work experience than paying for tuition
- Students who work are upwardly mobile, much more aware of the working conditions, corporate ethics and the world that they are going to enter. Hence, they will be prepared, emotionally and mentally, for the changes after their course completion
- Working learners develop stronger ties between the worlds of work and education
- The students are aware of their corporal value, they can choose wisely
- The already working graduates benefit from their work experience, which becomes an asset when they enter the full-time job market
